

M-Files Contract Management

A cloud-based, out-of-box solution for automating contract management and enforcing contract compliance

M-Files Contract Management is a complete, purpose-built, cloud solution for the creation, review, approval and disposition of contracts to drive consistency, transparency and accountability throughout your contract processes.

Supporting the entire lifecycle of contracts from initiation to archival

The benefits of automating contract management are real as contracts are central to commerce, when you manage them properly you reap a variety of benefits such as decreased cycle times, reduced admin time, increased visibility, security and compliance.
