Customer Success Story

Morgan Motor Company

0121 368 0154 hello@ebcgroup.co.uk

Overview

Morgan Motor Company came to EBC Group wanting greater control, stability and performance from its IT infrastructure across two sites. The existing environment required modernisation to improve reliability, strengthen security and provide a more resilient platform to support day-to-day operations. As a busy manufacturing business, reducing downtime and ensuring operational continuity were key priorities.

EBC Group worked closely with Morgan Motor Company to modernise its infrastructure, delivering enhanced connectivity, improved security, greater resilience and a new Webex telephony solution. The result is a more secure, efficient and dependable IT environment, giving confidence in the technology that supports their business.

Solutions Implemented

- **Connectivity and Network Infrastructure:** Improvements to enhance performance and reliability across both of Morgan Motor Company's sites.
- **Modern Security Deployment:** Solutions included WatchGuard technologies, to strengthen cyber security and provide greater protection against emerging threats.
- **Disaster Recovery Solutions:** Helping to minimise downtime and improve business continuity.
- **Hardware Upgrades:** To support a more stable and efficient IT environment.
- **Migration to Cisco Webex Telephony:** Delivering a more flexible and modern communications platform for staff.
- **Implementation of Ubiquiti Technologies:** To support network performance and management.

"EBC Group has given us greater confidence in the IT infrastructure that supports our business. Their technical knowledge, responsiveness and problem-solving have been excellent, and the project was delivered smoothly without disrupting our operations. They understand our business, provide great value and continue to support us extremely well."

- Johan Rheeder (Head of Information)
