

Swyx your business.

COMMUNICATION - EASY AND INDIVIDUAL

Swyx understands that users require the versatility of a solution that integrates a wide variety of devices. Swyx has made the choice easier by ensuring all Swyx devices are fully compatible with SwyxWare thus enabling all users to enjoy a telephony experience that is feature rich and user friendly.

The full capability of IP telephony can be utilized in a convenient and simultaneously cost-effective way with the combination of USB telephone and SwyxIt! Softphone. SwyxIt! handsets are simply connected to the USB port of a PC or laptop. All telephone functions are controlled via the graphic interface of the SwyxIt! application.

The headset is the optimal solution for constant use. With the USB headsets (headset and microphone), users can simultaneously operate the computer during a phone call. With the Swyx cordless headsets users are no longer tied to their desks, but are nonetheless within reach - a truly mobile solution.

SwyxPhone devices are smart desk phones which are directly connected by Ethernet to the local network. These telephones offer a wide functional range, e.g. function keys with LEDs, central and personal phonebooks, speed dials with display of call status, group call function or voicemail inquiry. In combination with the SwyxIt! PC telephone these devices ensure greater productivity.

The cordless Swyx DECT-over-IP products are the solution for staff who are frequently on the move in the office or the company premises.

Your personal office environment. In addition Swyx supports all major Smartphone platforms to allow mobile access to your personal office environment.

The intuitive Swyx interface enables that devices can be connected with ease. This ensures that the device is immediately operational once connected - administrative effort is kept to a minimum.

You can obtain further information from your authorized Swyx specialist dealer or at www.swyx.com

DEVICES FOR THE WORKPLACE

IP system telephones

SwyxPhone L62

Application

Independent, remote control with SwyxIt!
